

ELECTRICALLY REMOTE CONTROLLED ROLLER BLINDS

Mains or battery operation available, choice of blackout or standard blind fabrics

We make an extensive range of electrically operated roller blinds, full colour selection available.

Just let us know the colour you require and we will send you samples of fabrics available

Measuring inside recess blinds

Measure the inside recess accurately both the width and depth, we will allow the working tolerance.

Outside fitting blinds

Measure the recess plus the overlap that you wish the blind to cover. NOTE the fabric width is narrower than the total roller width.

All blinds are fitted with tubular motors which are housed inside the roller. Up to 6 blinds can be operated at one time.

Battery-operated blinds of course have no cable so are extremely easy to fit.

Remember electric blinds can be operated from the comfort of your own armchair they are also ideal for Windows that are not easily accessible.
